RELEVANT EXPERIENCE

Business Analyst (Internship) | Bazz Digital Systems

Jun 2023 - Feb 2024

- Eliminated 3-4 hours of weekly manual reporting by building automated MySQL and Python-based ETL pipelines to extract, clean, and structure inventory data; established consistent, high-quality data flows that improved forecasting reliability
- Resolved data inconsistencies across ~10,000 financial records by executing large-scale reconciliation using SQL and Excel (VLOOKUP, Pivot Tables) to identify and fix systematic mismatches; improved data accuracy by 30%, directly strengthening financial risk assessment reliability
- Developed two Power BI dashboards tracking KPIs, including inventory turnover and demand variance; partnered with 10+ cross-functional stakeholders across five teams to translate business questions into scalable analytics solutions, eliminating recurring ad-hoc reporting requests

ADDITIONAL EXPERIENCE

Crew Member | McDonald's

Jul 2025 - Present

- Managed full front-of-house operations simultaneously taking orders, bagging, and making drinks, processing 100+ orders per hour while leveraging POS data to streamline workflows and support daily cash reconciliation

PROJECTS

Customer Churn Risk Predictor | Python, SQL, Tableau

- Identified tenure, contract type, and monthly charges as top churn drivers within a 5000+ record dataset with a 20% churn rate; used SQL for data extraction and Python for feature engineering and pattern detection to surface actionable customer insights
- Built and tuned an XGBoost classification model to flag high-risk customers, achieving 85% accuracy; optimized the end-to-end data pipeline from raw data ingestion to model-ready features, reducing preprocessing complexity
- Translated model outputs into a Tableau dashboard surfacing retention insights across at-risk segments; enabled stakeholders to prioritize outreach, directly addressing the 20% churn rate with data-driven targeting

Sales Data Monitoring & Forecasting Tool | Power BI, DAX, Excel

- Developed an end-to-end Power BI dashboard with advanced DAX measures (Time Intelligence, YOY Growth), reducing executive reporting cycles by 60%
- Integrated A/B testing results to evaluate promotional and support data-driven revenue decisions
- Validated data integrity across multiple sales sources using Excel and Power BI checks, ensuring consistent KPI tracking and accurate forecasting

CIBC Data Challenge | Python (Pandas, NumPy), Power BI

- Built an end-to-end Power BI dashboard with advanced DAX measures including Time Intelligence and YOY Growth, consolidating four reporting views into one and automating three manual reporting processes
- Integrated A/B testing results revealing time-limited promotions outperformed loyalty-based offers in revenue impact; translated findings into data-driven recommendations to optimize promotional strategy
- Validated data integrity across four sales sources and ~6000 records using Excel and Power BI checks, ensuring consistent KPI tracking and accurate forecasting outputs

EDUCATION

Bachelor of Business Technology Management | Toronto Metropolitan University

May 2024

SKILLS

Excel, SQL, Python, Power BI, Tableau, ETL, Data Modeling, Forecasting, A/B Testing
